<ul style="list-style-type: none">• Overall:<ul style="list-style-type: none">→ Overall effective presentation of the float	
TOTAL:	

**Please note below the definition the judges will be using to define a float for your informational purposes:
A parade float is an elaborately decorated three-dimensional figure or scene that can be mounted on a wheeled chassis, or one that can be self-propelled, or one that can be towed by another vehicle or pulled by animals. For participation in the Annual Christmas Parade, the three-dimensional figure or scene should relate to the welcoming of the winter season and related holidays.**
